LITHOGRAPHING IN ALL ITS BRANCHES

86 & 88 CONGRESS ST.

Troy, N.Y.

TROY STREET DIRECTORY.

Giving the name of each street, and showing what other streets and places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained; as, for instance, wishing to know at what part of Second street No. 168 comes, look at Second street on page 14 and find that Liberty street crosses at 156, and Washington street at 178, showing that 168 Second street would come half way between Liberty and Washington streets.

SESSIONS.

The School year is forty weeks or four quarters of ten weeks each. Commencing with the third Wednesday in September, closing with the last Wednesday in June. The only vacation is during the Christmas holidays.

The success which has attended the efforts of the trustees of the Seminary to maintain a day school of the first-class in Troy is assured. The patronage of our citizens is generous, and the scholarship and progress of the pupils satisfactory.

The Institution has recently been more completely equipped for instruction in the physical sciences and classes in primary branches have been arranged, which offer unusual advantages for young children.

It is confidently asserted that pupils residing at their own homes in Troy, have at the Seminary, means of advanced education equalled by only a few of the best boarding schools and colleges for young ladies in the country.

The School thus affords to the citizens of Troy unexcelled facilities for the thorough and economical education of their daughters, while surrounded by home influence and parental care.

An investigation of the merits of the school is respectfully invited.

This Company owns the entire water power of the Mohawk River at Cohoes, embracing the celebrated Cohoes Falls. Aggregate fall, one hundred and twenty feet, giving nearly ten thousand horse power. The Company's gate house and dam are among the finest structures of the kind in the United States.

The canals are so constructed as to give a succession of falls from one canal to another, varying in height from twelve to twenty-five feet. The power is leased by the Company, with land for factory building, in perpetuity, at an annual rental of about twenty dollars per horse-power, and considering the quality, is the cheapest in the country. It is an unfailing power; and during the past few years, while most of the water powers in the country have failed for a time, Cohoes has had an abundant supply, without one minute's stoppage. About one-third of this magnificent power is unappropriated, and appurtenant thereto are some of the finest factory sites to be found anywhere.

Cohoes is situated at the confluence of the Mohawk and Hudson Rivers, about four miles from Troy and ten from Albany, and is eligibly located with reference to New York and other markets, and possesses superior advantages for transportation to market, either by river, canal or railroad, having two canals and two railroads running through it. It is a thriving young city of nearly twenty thousand inhabitants, and contains some of the finest cotton and other factories in the United States.

JOHN HANCOCK MUTUAL LIFE

INSURANCE CO.,

OF BOSTON, MASS.

Has Paid over - - $10,000,000

TO ITS POLICY HOLDERS.

It is the only Company which has ever paid a DIVIDEND to its Industrial Policy-Holders.

ALL POLICIES OF THIS COMPANY ARE IN IMMEDIATE BENEFIT FROM DATE OF THE POLICY.

IT HAS NO UNPAID DEATH CLAIMS.

IT is the Oldest Company issuing Industrial Policies.

IT issues a more Liberal Policy than any other Company.

CAN you afford to go without protection when you can secure it for the small sum of **2 Cents a Day?**

THOUSANDS of Claims paid without dispute. Ask the Agent for a list of those paid in your vicinity.

ALL claims for loss are payable at the Agency through which policy was delivered, within twenty-four hours after satisfactory proof of death is received at the Home Office.

Do you realize the advantages of having your policy in Immediate Benefit? The list of parties to whom such claims have been paid is too long for publication, but any John Hancock agent will give you a partial list.

If you wish to know what Immediate Benefit means in dollars, see the following list of amounts paid in various years under policies which had been issued less than three months:

Paid in 1879,	**$ 148.67**	**Paid in 1885,**	**$ 3,800.00**
" 1880,	**4,787.25**	**" 1886,**	**6,756.28**
" 1881,	**2,566.22**	**" 1887,**	**7,927.54**

Mutual Benefit Life Insurance Co.

OF NEWARK, N. J.

AMZI DODD, President.

Assets :	Paid to Policy-Holders since organization:	Surplus :
$46,997.43.	$112,911,500.18.	$3,431,274.69.

Gives the greatest amount of insurance for the least money of any regular old line Company in existence.

NO ESTIMATES THAT NEVER CAN OR WILL BE MADE GOOD!

Every Value of the Policy is an Absolute Contract and stated in plain figures on the Policy:

What the Company will pay for the same at the end of every year after two years' Premiums have been paid.

What they will lend on the same.

How many years and days the Insurance will be extended for the full amount of the Policy in case the insured stops paying Premiums.

[See following illustration:]

On May 27th, 1881, John McBride, a contractor and builder, of Troy, N. Y., was insured in the Mutual Benefit, of Newark, N. J., for $3.000. He paid his premiums regularly up to Nov. 27, 1886, but did not pay the premium due on that date, or any subsequent premium. Instead of the insurance being forfeited, as would be the case in most other companies, this company, according to their contract, extended the insurance for as long a time as the value of the policy would pay for, which was eleven years and two hundred days. Mr. McBride died in September, 1890, about **Four** years after the lapse of his policy, which was paid in full, $3.000, the fifth day after they received the proofs of death.

A line addressed to the undersigned, giving age (nearest birth-day), will procure a Sample Copy of this Company's Policy, with every option granted by the Company stated in plain figures, for each year.

THE NORTHWESTERN does not write business in Foreign Countries, and only in the healthy portions of the United States.

THE NORTHWESTERN Dividends are from 15 to 40 per cent. larger on similar policies than paid by other Companies.

The Only Company in this Country Computing its Legal Reserve

ON A 3 PER CENT. BASIS.

During the year 1882, in view of the tendency to a gradual decline in the rate of interest, and of the long time many policies had to run, and in order to provide against every contingency arising therefrom, the company changed its standard of solvency as to new business, basing its calculations on earning 3 per cent. instead of 4 per cent., (which latter is the legal standard)—the only instance in this country of a conservative change of basis by any company.

This higher Reserve means:

1. **The highest security known to Life Insurance.**
2. **A reduction in the margin for expenses.**
3. **An ability to invest in the best securities.**
4. **Larger accumulations of money to earn interest for policy holders.**
5. **Larger future returns of dividends.**
6. **Larger paid up values.**
7. **Larger Cash Values.**

COLUMNS

Of Advertisements are often printed in THE BUDGET—nearly 25 columns more than in any other paper of Troy or vicinity of the Saturday previous.

THE BUDGET is the advertising medium for northern and eastern New York, Vermont, western Massachusetts and western Connecticut.

THE BUDGET publishes more of what is known as small advertisements, such as "Wants," "For Sales," "To Lets," "Rooms and Board," in one issue than all of the Troy papers put together.

THE BUDGET is a 12, 16 or 20-page paper, as advertising demands. Its advertising rates are no higher, circulation considered, than any other paper in this vicinity.

PIKE PLUMBING and VENTILATING SYSTEM

This System has for its object the Ventilation of Sewer, Soil and Waste Pipes, and their connections, and to prevent the siphoning of the Traps. **Maintaining a continuous current of air at all times to draw the Gases and Foul Air from the pipes and receptacles and preventing them from being driven into the house by flushing.**

In the systems heretofore in use, the ventilation has been mainly into the soil pipe or chimney. When separate Ventilating Pipe has been used there has been no independent, continuous Ventilating Pipe, so connected to the soil pipe and receptacles that a continuous current of air was maintained at all times.

A full description of this System will be given on application.
